

# Quantum Computing Primer

## Summer School

October 11<sup>th</sup> – 15<sup>th</sup> 2020

Quantum computers hold the promise of revolutionizing the world of computing and having a great impact on research, industry, and business. As this new technology unravels, there will be a great need for quantum computing experts.

**Start learning quantum computing now.** This summer school will provide basic training in fundamental and applied quantum computing for students and professionals from the industry. Topics to be covered include:

- Fundamentals of quantum computing and quantum information
- Physical realizations of quantum computers
- Applications of current-day quantum computers
- Hands-on experience with quantum computing

■ The school will take place using on-line platforms. ■
